In the theme week of Climate and Biodiversity at the World's biggest business event – Dubai Expo 2020, Government of Gujarat, led by Mamta Verma, Principal Secretary, Energy and Petrochemical Department, presented a seminar on renewable energy, 'Gujarat — Leading

India's Green Energy Transition' on Monday.

India has made significant progress towards achieving growth in renewable energy capacity among all large economies, and Gujarat is leaving no stone unturned in contributing to the country's goal to achieve 450 GW of installed renewable energy capacity by 2030.

The 'Climate & Biodiversity Week', October 3-9 2021, began at the Dubai

Expo with the India pavilion hosting events, running India stories, leadership engagements, events on themes of renewable energy, biodiversity and wildlife, climate change, and sustainability, and several entertainment and cultural shows during this week.

The conferences will have the presence of speakers, participants and leaders from Indian and Global companies in the days to come.
